1. GAME OVERVIEW

SHIRTSCAPE is a competitive game where one robot earns points by collecting t-shirts, navigating around the Big Evil Tree, and delivering garments to the Wardrobe. The robot with the highest point total at the end of the match wins.

1.1 Single Robot Competition

Only ONE robot competes on the field per match. This is a solo competition where each team's robot plays independently.

Match Duration: 1 minute 30 seconds (90 seconds total)

- **Autonomous Period:** 15 seconds (0:00 — 0:15)
- **Teleop Period:** 75 seconds (0:15 — 1:30)

2. AUTONOMOUS PERIOD (0:00 — 0:15)

2.1 Autonomous Mode Overview

The robot operates under pre-programmed autonomous code with no driver input allowed. The robot may attempt to:

- Leave the Starting Line
- Navigate around the Big Evil Tree
- Collect t-shirts
- Deliver shirts to the Wardrobe

2.2 Autonomous Scoring — DOUBLE POINTS

All shirts delivered to the Wardrobe during the Autonomous Period are worth **DOUBLE** the normal points. This includes height-based point bonuses.

2.3 Autonomous Movement Restrictions

The robot must remain within the defined field boundaries. Any robot that leaves the field during Autonomous forfeits Autonomous scoring for that match.

3. TELEOP PERIOD (0:15 — 1:30)

3.1 Teleop Mode Overview

The driver assumes full manual control of the robot. The robot may:

- Collect t-shirts from the Human Player at the Textile Station
- Navigate around the Big Evil Tree
- Deliver shirts to the Wardrobe
- Reposition for optimal scoring

3.2 Human Player Role

A designated Human Player manages the Textile Station and distributes t-shirts to the robot during Teleop. The Human Player may NOT throw or launch shirts outside the designated Textile Station area.

NOTE: The robot must be fully positioned within the Starting Square for the Human Player to load t-shirts. If any part of the robot extends outside the Starting Square, the Human Player may not transfer shirts to the robot.

3.3 Teleop Scoring

Shirts delivered during Teleop earn standard points based on delivery height (see Section 5: SCORING).

4. ROBOT BEHAVIOR RULES

4.1 Big Evil Tree

The Big Evil Tree is an obstacle on the field that the robot must navigate around. The robot may not push, move, or damage the Big Evil Tree.

- Contact with the Tree does not result in penalties but indicates poor navigation strategy.

4.2 Starting Line

The robot must begin each match fully in or touching the Starting Square. The robot may leave the Starting Line at any time during Autonomous or Teleop.

4.3 Field Boundaries

The robot must remain within the defined field boundaries throughout the match. Any part of the robot extending beyond boundaries results in:

- **First violation:** Warning
- **Subsequent violations:** Loss of points for that match

5. SCORING SYSTEM

5.1 Shirt Delivery

Shirts are delivered to the Wardrobe, a vertical structure with multiple height levels. Point values vary by delivery height.

5.2 Point Values by Height

Height Level	Points
Ground Level (lowest)	1 point
Mid Level	2 points
Upper Level	3 points

5.3 Autonomous Bonus

All shirts delivered during Autonomous are worth **DOUBLE** their normal height-based points:

Height Level	Autonomous Points
Ground Level	2 points
Mid Level	4 points
Upper Level	6 points

5.4 Big Evil Tree Hit Bonus (Autonomous Only)

Hitting the Big Evil Tree during the Autonomous Period earns **2 bonus points**. Hitting the tree constitutes making solid contact with the robot. This bonus is awarded once per match, regardless of multiple tree contacts.

5.5 Scoring Validation

Shirts must be completely secured in the Wardrobe Hole to count as delivered. Partially placed or unstable shirts do not earn points.

5.6 Robot Carrying Capacity

The robot may carry a maximum of **5 t-shirts** at any given time during the match. Once the robot reaches capacity, it must deliver shirts to the Wardrobe before collecting additional shirts from the Human Player.

5.7 Shirt Packaging

Teams may bundle, tie, or package shirts in any manner they see fit.

6. MATCH WINNING CRITERIA

6.1 Victory Condition

The robot with the highest total point score at the end of the match wins.

6.2 Tie-Breaking

In the event of an equal point total:

1. The robot with the most shirts delivered in Autonomous wins
2. If still tied, the robot with the highest single shirt placement wins
3. If still tied, the match is declared a tie

7. FOULS AND PENALTIES

7.1 Major Fouls

- Damaging the Big Evil Tree or Wardrobe structure
- Interfering with the Human Player
- Removing shirts from the Wardrobe after delivery
- Driving outside field boundaries persistently

Penalty: Loss of 10 points per major foul

8. MATCH FLOW SUMMARY

9. SPECIAL NOTES

9.1 Safety

All robots must comply with standard FIRST Robotics safety guidelines. Unsafe robot behavior may result in match disqualification.

9.2 Equipment

- All t-shirts are regulation competition shirts provided by organizers
- Robots may not modify or damage shirts during collection or delivery
- The Big Evil Tree and Wardrobe structures are off-limits for modification

9.3 Game Updates

Game rules are subject to clarification throughout the season. Teams will be notified of any rule modifications via official channels.
